

QUALITY, ENVIRONMENT, AND SAFETY POLICY

HEXA GREEN S.r.l. is actively engaged in the maintenance and protection of the land.

As a result of the transfer of the entire branch of business by Cosmo Ambiente S.r.l., HEXA GREEN S.r.l. has become a leader in the recovery of inert materials from demolition and reclamation sites and the management of landfills and technological systems.

The company also deals with the decommissioning of works, the land remediation of industrial sites, in-situ and ex-situ asbestos remediation, land stabilisation, infrastructure development, the transport of hazardous and non-hazardous waste, waste brokerage activities, aggregates waste recovery on construction sites using qualified treatment that makes it possible for the material to be reused in the building sector and for road construction infrastructure with mobile crushing and screening plants.

Thanks to its organisational and management system, HEXA GREEN S.r.l. is able to identify and implement investment opportunities and internal restructuring to offer its customers a wide range of qualitative and quantitative, high-quality services and products.

The dynamic nature of the market and the constant demand for high quality environmental services have led to the expansion of the company's organizational and corporate system, and to the implementation of a Quality, Environment and Safety management system in accordance with the UNI EN ISO 9001, UNI EN ISO 14001, UNI ISO standards, also adopting an Organizational Model pursuant to Legislative Decree 231/2001 in order to anticipate and avoid the offences covered by the aforementioned Decree and has stated its commitments in the Code of Ethics, addressed to all those who are employed by, collaborate with, or provide consultancy or supply services to HEXA GREEN. This organisational system is based on the service expected by clients, buyers, and other stakeholders and what HEXA GREEN is able to offer.

"If you want to benefit from the gifts of nature, you have to adapt to its needs, its rules, and norms"

(SHIMON PERES)

Acutely aware of its leadership role, Management promotes and supports the commitment that the entire Organisation must fulfil the requirements of the Integrated Management System and continuously strive to improve it.

In this context, the objectives that the Management undertakes to achieve are:

- ✓ Identify the risks associated with the company's activities and the opportunities for improvement, planning any subsequent actions required;
- ✓ to achieve a high level of customer satisfaction by analysing the customers' expressed or implicit needs and collaborating with them to accurately define the design and executive requirements, in compliance with quality standards, and constantly strive to improve this relationship over time and increase the customer's awareness of improvements in health and safety and the level of environmental protection;
- ✓ Monitor their company's impact on the environment and examine the life cycle of their services and products to prevent pollution or disturbance to the local inhabitants and other interested parties, ensure a more effective management of any environmental emergencies and look for new ways to reduce their impact on the environment through the adoption of the cleanest, most economically feasible technologies available on the market;
- ✓ Maintain a proactive approach of continuous improvement of the health and safety indices, taking into account the factors of primary importance, in order to reduce the risk of accidents and occupational disease;
- ✓ Ensure compliance with applicable legislative and voluntary requirements;
- ✓ Choose suppliers who adopt clean technologies and respect the health and safety of their workers, preferring companies that have environmental, safety and/or quality management systems in place, with a view to raising awareness and participation;
- ✓ Collaborate with public authorities, local communities, and other parties who have a legitimate interest in the company's activities;

To achieve these objectives, the Management guarantees the availability of the necessary resources and promotes a culture of continuous involvement, consultation, training and retraining of personnel at all levels, increasing their skills and levels of professional satisfaction and individual development, since it is only possible to achieve the set objectives and protect the health and safety of workers and the environment with the collaboration of everyone involved.

The commitments made in this Policy are translated into a plan of objectives defined and measured using the appropriate indicators, with planning of relevant activities to help to achieve them. This plan is re-examined at least once a year, as is the effectiveness of the integrated management system.

This Policy is periodically reviewed and, if necessary, revised on the occasion of the Management and Systems review, and the Management undertakes to make it available internally and externally, while encouraging its partners to do the same.
